

**WISC-IV GAI Worksheet**

Student \_\_\_\_\_

Age \_\_\_\_\_

VCI \_\_\_\_\_ < WMI \_\_\_\_\_ = Difference of \_\_\_\_\_

VCI \_\_\_\_\_ > WMI \_\_\_\_\_ = Difference of \_\_\_\_\_

PRI \_\_\_\_\_ < PSI \_\_\_\_\_ = Difference of \_\_\_\_\_

PRI \_\_\_\_\_ > PSI \_\_\_\_\_ = Difference of \_\_\_\_\_

WMI \_\_\_\_\_ < PSI \_\_\_\_\_ = Difference of \_\_\_\_\_

WMI \_\_\_\_\_ > PSI \_\_\_\_\_ = Difference of \_\_\_\_\_

Is the difference significant @ .05 level? (table B.1)    yes    no

Base rate for discrepancy (table B.2)    \_\_\_\_\_

Is the base rate less than 10%    yes    no    (indicates rarity)

If difference is both rare and significant, proceed.

VCI sum of scaled scores \_\_\_\_\_ + PRI sum of scaled scores \_\_\_\_\_ = \_\_\_\_\_

GAI (table 1 of technical report 4)    \_\_\_\_\_

FSIQ \_\_\_\_\_ minus GAI \_\_\_\_\_ = \_\_\_\_\_

If difference is equal to or greater than 8, then it is appropriate to report the GAI.
